DETAILED ACTION

1. Acknowledgment is made of applicant's 3-month extension of time and amendment which were received by the Office on October 23, 2003 and on November 7, 2003, respectively. These documents have been made of record in the file as Paper Nos.6 and 9, respectively.

2. Claims 1-8 are canceled. Claims 9-17 have been added and are active.

Double Patenting

3. In view of applicant's cancellation of claims 1-8, the Examiner is withdrawing the 35 U.S.C 101 double patenting rejection based upon U.S Patent No. 6,317,631 which was made against these claims in the last Office action.

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 9, 10, 11, 12, 13, 14, 16, and 17 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 24, 25, 26, 27, 32, 33,

Art Unit: 3762

53, and 54, respectively, of U.S. Patent No. 6,317,631. Although the conflicting claims are not identical, they are not patentably distinct from each other because the applicant's method and apparatus claims, which are very similar to those of the '631 patent, broadly refer to the delivery of a "non-excitatory stimulus", which reads upon the more specific "non-excitatory electric field" recited in the claims of the '631 patent. Similarly, applicant's apparatus claims 13, 14, 16, and 17 utilize the general term "stimulus application devices[apparatus]", which reads upon the more specific "electrodes" of claims 32, 33, 53, and 54, respectively.

Allowable Subject Matter

6. Claims 9-17 would be allowable upon submission of a terminal disclaimer filed in compliance with 37 CFR 1.321(c).

7. Claim 15 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 3762

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
